Steel Structures Painting
Council – Vice President

Mr. Roetter joined Tank Industry Consultants, Inc. in 1984 as an engineer to assist in all phases of the prebid and work in process inspections, construction inspections, and design. He a Managing Principal at TIC and is responsible for the day-to-day operation of the company.

Steve is actively involved in industry-wide standards-making organizations and educational activities. His expertise in the environmental compliance has been acknowledged in an invitation to chair the Steel Structures Painting Council's 1993 Lead Abatement Conference. He was also the Tutorial Chairman at the Steel Structures Painting Council's 1994 annual conference in Atlanta. He is Vice President of SSPC: The Society for Protective Coatings and has spoken extensively at industry meetings and conventions throughout the United States and has authored papers entitled "Rehabilitation and Maintenance of Steel Water Storage Tanks," and "Operator Inspection of Water Tanks."

Mr. Roetter authored a Manual for Steel Tank Inspection for the U.S. Navy and a Chapter on Rehabilitation and Maintenance of Steel Water Storage Tanks in the "Water Supply System Rehabilitation" for ASCE's Task Committee on Water Supply System Rehabilitation.

He is a member of AWWA Tank Manual Task Force

In addition, Mr. Roetter has given presentations at SPFA, NACE, AWWA and Rural Water Association conferences. He also is an instructor at Tank Industry Consultants "Maintenance, Design and Construction of Steel Water Tanks" Seminars and the SPFA/AISI nationwide "Steel Water Tank" seminars.
