

2-DAY TANK SEMINAR

Storage Tank Design, Construction & Maintenance

**Philadelphia, Pennsylvania
July 29 & 30, 2008**

**Raleigh, North Carolina
August 12 & 13, 2008**

Course Content

This two-day seminar, lead by the industry's **foremost tank experts**, emphasizes the creation and implementation of a comprehensive tank maintenance program. You will learn how to develop construction and maintenance programs, plan and budget for the anticipated work, implement inspection programs to gather needed information, and manage the decision-making process. Other topics include the bidding process, contractor selection, quality control, inspection equipment, lead-paint abatement, and seismic, wind, and ice loadings.

Registration fee: \$295

Day One

8:00 a.m. — Registration

8:30 a.m. to 4:30 p.m. — Seminar

- Tank Failure Modes
- Basics of Corrosion
- Preventing Corrosion in Storage Tanks
- Coatings and Cathodic Protection
- Specifying New Tanks

Day Two

8:30 a.m. – 4:30 p.m. — Seminar
