Years of Experience: 24

George Paradise has been with Tank Industry Consultants for 21 years and has assisted in all aspects of coatings and structural evaluation of water storage tanks and other steel and concrete structures. Prior to joining TIC, George had three years of diversified experience as a field and quality control technician in a variety of industrial environments. He has extensive experience in quality assurance inspection of blast cleaning, coatings application, lead-paint abatement and welding.

Prior to joining TIC, George was involved in a number of industrial lead-paint abatement and coating quality control projects including water storage tanks, smoke stacks, bridges, and decorative steel structures. He possesses a strong technical background in coating defects, instrumentation, and documentation skills. His high degree of technical knowledge, coupled with his strong communication skills, enables him to readily identify and resolve problems in an incisive expedient manner.

Since joining Tank Industry Consultants, George has been involved in water storage tank evaluations, repair and repainting projects throughout the United States. He is experienced in surface preparation and coating application for all types of industrial coatings.
