- Academy of Certified Hazardous Materials Managers Primary Representative to the ANSI Confined Space Committee (Z117)

Years of Tank Experience: 15

Jennifer Coon is responsible for developing, communicating, and monitoring Tank Industry Consultants extensive Health and Safety program. Jennifer authored, updates, and enforces all aspects of TIC's construction safety program that include Lead in Construction, Hazard Communication, Personal Protective Equipment, Confined Space, and Lockout/Tagout components. She conducts all in-house safety training and respirator fit tests, and supervises medical surveillance plan in accordance with all applicable OSHA regulations. In addition to her safety responsibilities, Jennifer has **written over 2,120 technical reports** addressing the condition of water storage tanks. These reports included recommendations for safety, sanitary, and aesthetic improvements to meet applicable industry standards.

Jennifer authored a chapter on *Maintenance, Inspection, and Repair* in the *Steel Water Storage Tanks Handbook* published by McGraw Hill, in conjunction with the American Water Works Association, and is a sought-after speaker for AWWA state and local section meetings.

Jennifer's environmental work experience includes work for the Indiana Department of Environmental Management (IDEM) where she performed her internship with the State Clean-Up Section and was later engaged as a project manager in their LUST program. She was also Project Manager/Health and Safety Director for a large environmental services group. There she managed the two largest corporate accounts and performed more than 100 Phase I Environment Site Assessments and several Phase II Subsurface Investigations in seven Midwestern states.

Jennifer has extensive training in environmental issues including the **OSHA Eight-Hour Hazwoper Refresher Courses**, which she teaches.
